## Notice Regarding the Change in Dividend Policy

---

---

Daiichi Life Group, Inc. (President and Group CEO: Tetsuya Kikuta; hereinafter “the Company”) hereby announces that its board of directors has resolved at its meeting held on May 15, 2026 to change the dividend policy as follows.

### 1. Reason for the Change

The Group's basic policy is to strive to enhance corporate value by maintaining financial soundness to prepare for future changes in the business environment, securing internal reserves necessary for investment in growth, and returning profits to shareholders in an appropriate manner with an awareness of the cost of capital, all of which must be balanced. The basic policy for shareholder returns in the “the Dai-ichi Life Group medium-term management plan covering fiscal years 2024 to 2026” set a numerical target of a dividend payout ratio of 40% or more (calculated based on the average of the Group adjusted profit for past 3 years) for each fiscal year. Furthermore, beginning with the fiscal year ending March 31, 2026, the Company has raised the dividend payout ratio target to 45% or more for each fiscal year.

In order to further return profits to shareholders, the Company has decided to adopt a new dividend policy of 50% or more per year (calculated based on the average of the Group adjusted profit for past 3 years) from the fiscal year ending March 31, 2027.

### 2. Details of the Change (Underlined sections indicate changed parts)

(Before) dividend payout ratio of 45% or more (calculated based on the average of the Group adjusted profit for past 3 years) for each fiscal year

(After) dividend payout ratio of 50% or more (calculated based on the average of the Group adjusted profit for past 3 years) for each fiscal year

(\*)For the fiscal year ended March 31, 2026, the dividend policy set a target of a dividend payout ratio of 45% or more each fiscal year and a total payout ratio of 50% on a medium-term average basis. However, beginning with the fiscal year ending March 31, 2027, the Company has established a numerical target of a dividend payout ratio of 50% or more each fiscal year.
